Step 3: Configure Hardware

Adjust CPU and memory settings based on system capability.

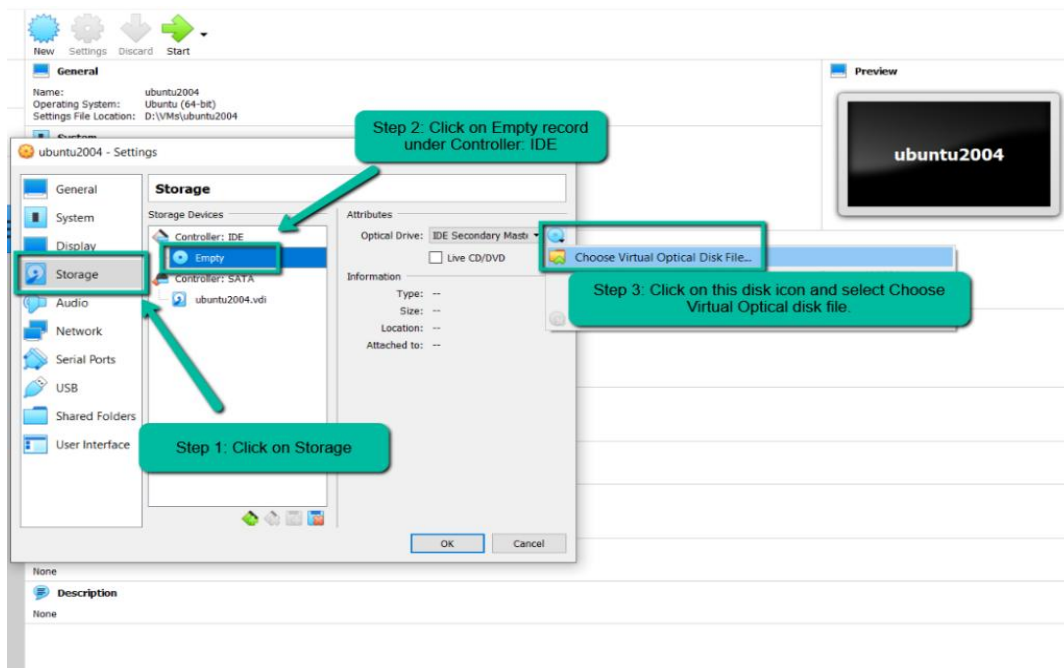

Step 4: Display Settings

Increase video memory for better graphical performance.

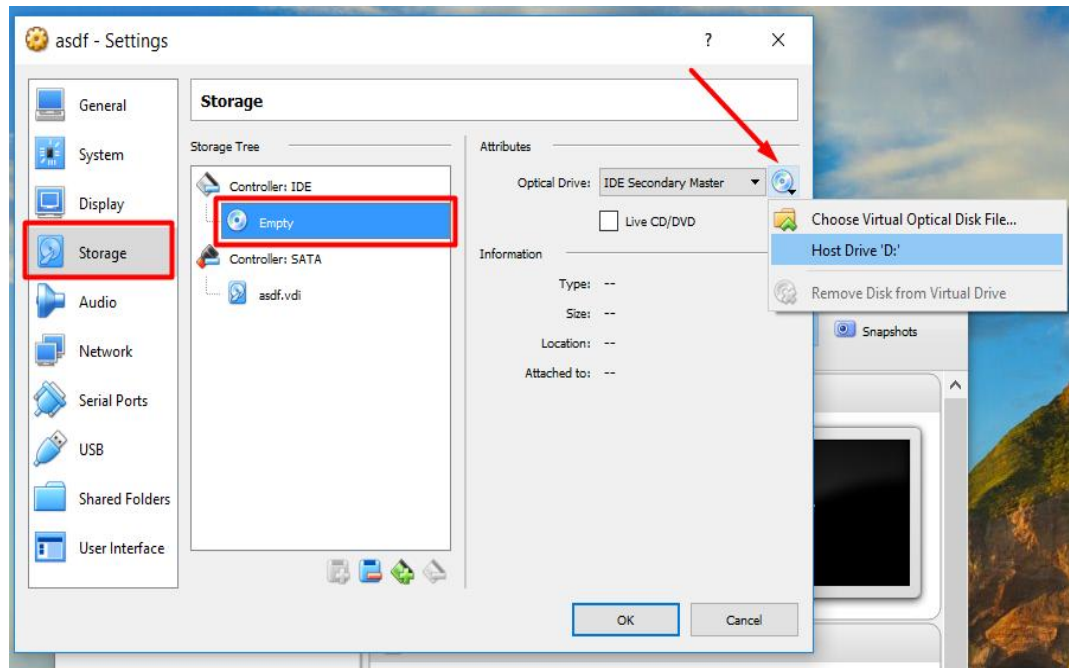

Step 5: Attach ISO File

Go to Storage settings and attach the Ubuntu ISO file.

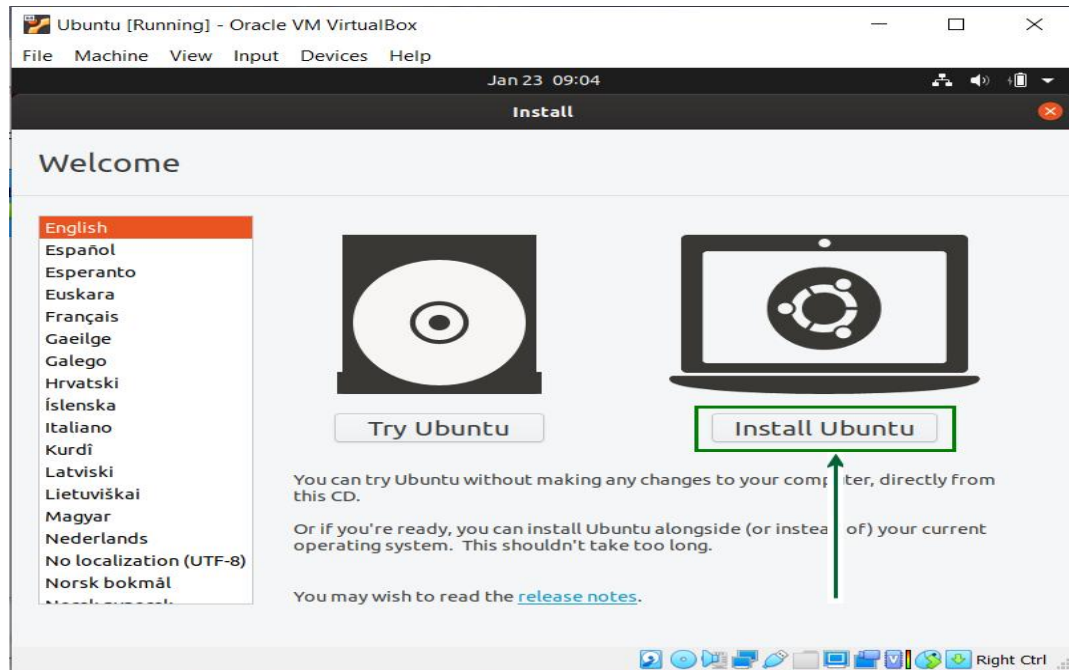

Step 6: Select ISO File

Choose the Ubuntu ISO file from your system.

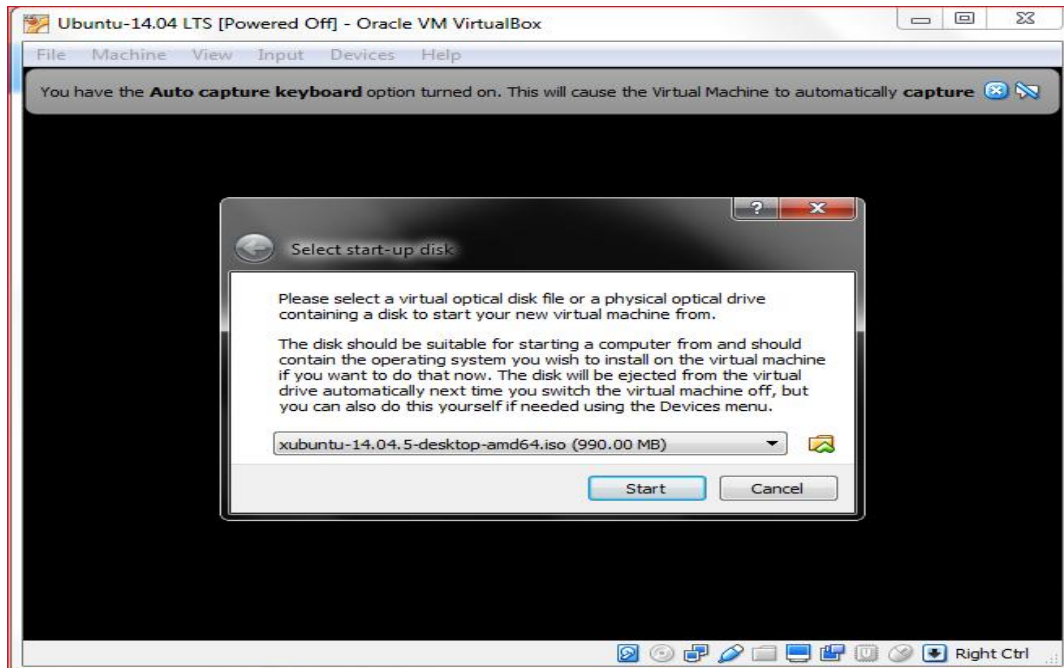

Step 7: Start VM

Select the VM and click Start to begin installation.

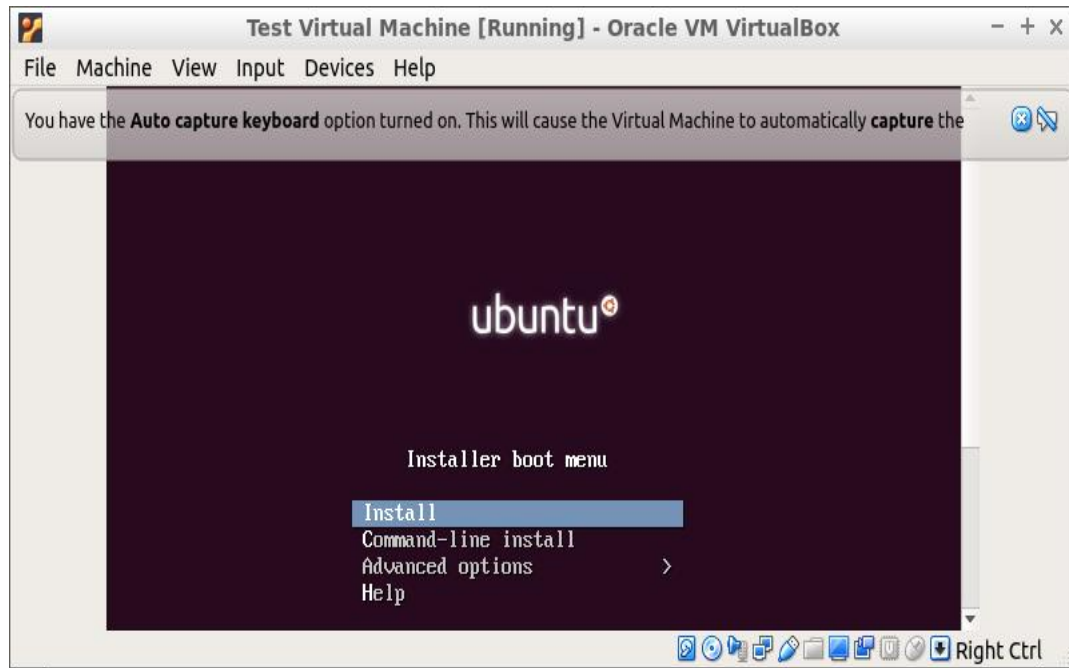

Step 8: Boot Menu

Choose 'Install Ubuntu' from the boot menu.

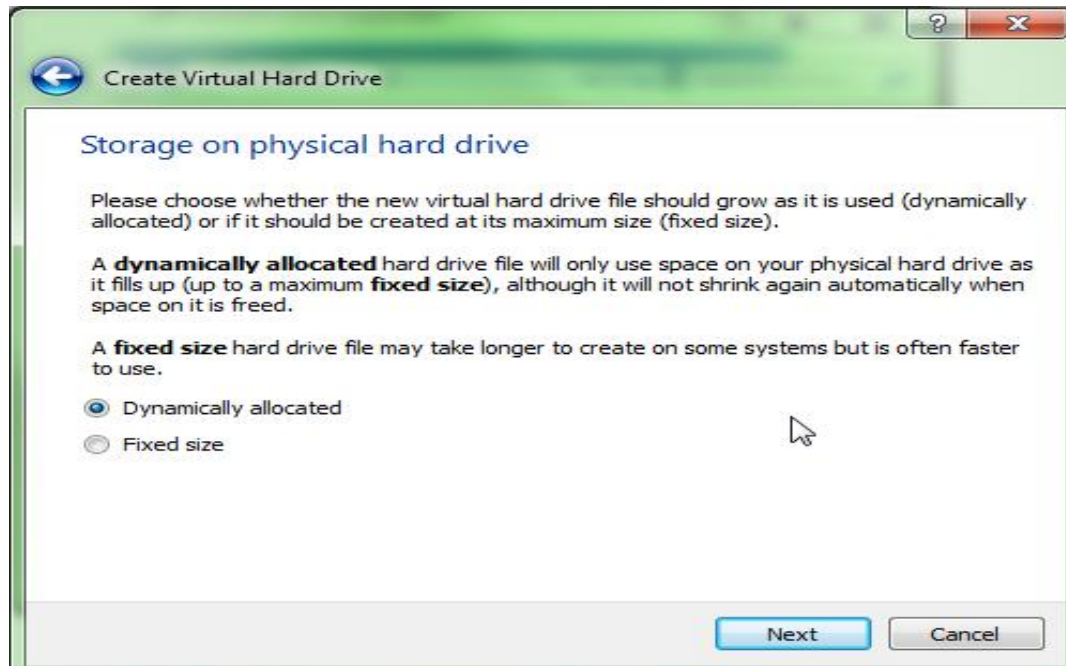

Step 9: Installation Screen

Click on 'Install Ubuntu' option.

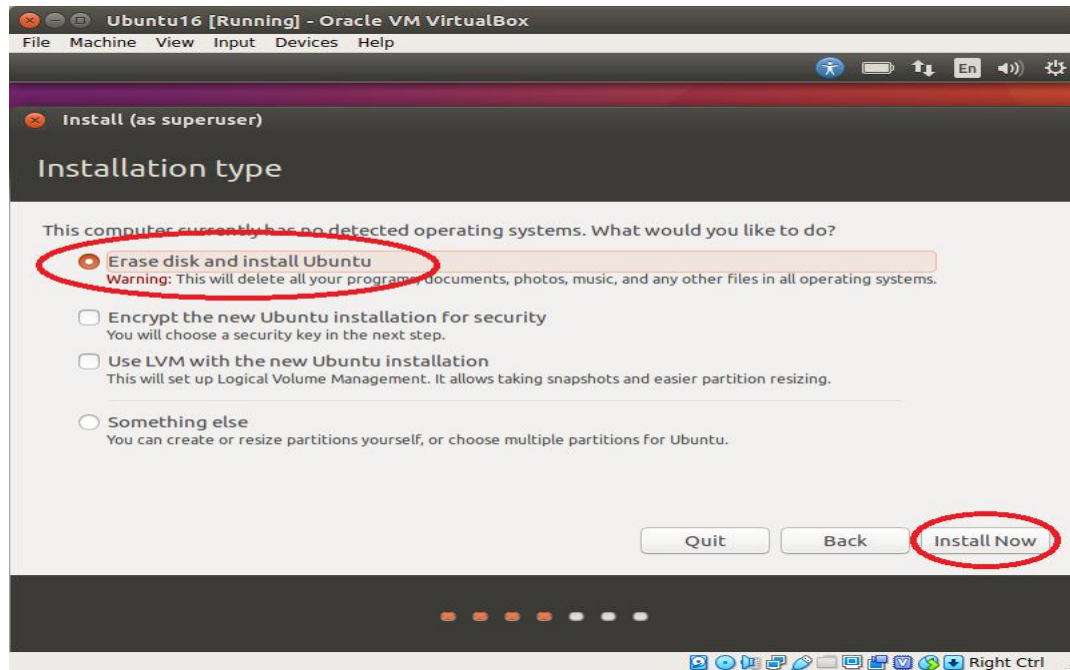

Step 10: Installation Type

Select 'Erase disk and install Ubuntu'.

Step 11: Create User

Set username and password for the system.

Step 12: Installation Complete

Restart the system after installation is complete.
